## Full Electric Shuttle for public transport in Lubiana

Still fully operational in Slovenia, where was delivered in 2013, the "Geco" Shuttle is serving the city of Lubiana, providing a free public transport service through its 164 km<sup>2</sup> area.

Our Slovenian dealer "Exprum d.o.o." is very satisfied to have provided three Gecos to the capital and our vehicle seems to hold on very well, since the first one delivered six years ago has covered over 100.000 Km!

"Kavalir" is the name which was given to this touristic service, whose efficiency was underlined some time ago by the Italian Political Talk Show "Dimartedì" broadcasted by La7, where some people in the street were interviewed and they all expressed positive feedbacks about that, telling how it is comfortable to have a free eco-friendly way of transport, which takes you through the most representative places of the city.

( <http://www.la7.it/dimartedi/video/lubiana-dove-muoversi-%C3%A8-facile-23-04-2019-269668> )

Free travel on board Kavalirs was made possible by the LPP, the city's bus company, in collaboration with the City Municipality of Lubiana and Lubiana Tourism, the city's tourist board.
